

REAL LEADERSHIP.
REAL VALUE.
REAL PERFORMANCE.

Virtex-4 beats competing FPGAs in every performance category

Virtex-4 FPGAs beat the competition in EVERY performance category.

Only Virtex™-4 Platform FPGAs offer you superior performance in every aspect of a system. No other FPGA comes close to Virtex-4, which delivers a huge advantage in I/O bandwidth, on-chip RAM speed, DSP & processing compute bandwidth, and logic fabric performance. Having all the right features is the only way to achieve breakthrough performance at the lowest cost.

THE WORLD'S FASTEST AND LOWEST POWER FPGAs!

Virtex-4 FPGAs also give you high performance without breaking your power budget, with significantly lower power consumption than competing 90nm FPGAs, up to 94% lower in-rush power, 78% lower static power, and 86% lower dynamic power.

Visit our website today, view the TechOnLine seminar, and find out more about the *real* leader in FPGA performance.
